ERRATUM

Polar Research 17(2) contains an error on page 132. The incorrect sentence is: "The other species of diploxyl pines found in Siberia, *P. pumila*, is an unlikely source since it is a dwarf tree (Farjon 1984)." It should have been: "The species of haploxyl pine found in Siberia, *P. pumila*, is an unlikely source since it is a dwarf tree (Farjon 1984)." The editor thanks the author, S. Johansen, for bringing this to our attention.
