Supplementary Table S2. Sample coordinates and locations. The oriented samples for this study were collected during the Heimefrontfjella expeditions 1985/86 and 1989/90 and the analytical work was carried out between 1992 and 1994. All samples have been transferred to the National Polar Sample Depository at the Federal Institute for Geosciences and Natural Resources at Berlin–Spandau, where they are accessible for further scientific studies.
